Name	Data Type	Purpose

1 Will Algorithms

1.1 Actual Grace

If the total is lower than 60, then the grace is rejected

- 1. Generate a random integer 0 and 100
- 2. Add the summation of humility pride
- 3. Add the summation of prudence (Subvirtues Subvices)
- 4. If it's against another person, add the passions of the relationship together
- 5. Do the same with general passions
- 6. Add the passions again if they're mentioned in the PRE_CONDITIONS
- 7. Add the sub virtues in the PRE_CONDITIONS multiplied by 4
- 8. Subtract the sub vices PRE_CONDITIONS multiplied by 4

1.2 Temptation

If the total is lower than 60, then the grace is rejected

- 1. Generate a random integer 0 and 100
- 2. Add the summation of humility pride
- 3. Add the summation of prudence (Subvirtues Subvices)
- 4. If it's against another person, add the passions of the relationship together
- 5. Do the same with general passions item Add the passions again if they're mentioned in the PRE_CONDITIONS
- 6. Add the sub virtues in the PRE_CONDITIONS multiplied by 4
- 7. Subtract the sub vices in the PRE_CONDITIONS multiplied by 4
